## 8 registered strains

SivoMixx® contains the following live bacterial strains:

- *Streptococcus thermophilus* DSM 32245/CNCM I-5570: 80 billion
- 5 lactobacilli: 70 billion  
*L. acidophilus* DSM 32241/CNCM I-5567, *L. helveticus* DSM 32242/CNCM I-5573, *L. paracasei* DSM 32243/CNCM I-5568, *L. plantarum* DSM 32244/CNCM I-5569, *L. brevis* DSM 27961/CNCM I-5566
- 2 bifidobacteria: 50 billion  
*B. lactis* DSM 32246/CNCM I-5571, *B. lactis* DSM 32247/CNCM I-5572

## Recommended daily intake

The recommended daily dose is 1-2 sachets or 2-4 microcapsules depending on the body weight. For detailed information on dosages, register to the HCP section of our website at [www.sivomixx.net/en/hcp](http://www.sivomixx.net/en/hcp)

The improvement can already be felt after a few days, the optimal colonization is achieved in 2-3 weeks.

Bloating can occur, this is a transient phenomenon due to the adaptation of your intestinal flora to the new bacteria.

## How to take SivoMixx®?

Open the sachet and stir the contents into 100 ml of cold non-carbonated drink, yogurt or applesauce and ingest immediately.

Microcaps can be administered by mouth as a whole capsule or pulled open to release the powder.

Keep SivoMixx® sachets in the refrigerator (+2-8°C). SivoMixx® sachets can stay out of the refrigerator (<25°) for up to one week without affecting its potency.

Thanks to its patented CSP vial, the microcaps can be kept at room temperature until the "best before" date.

SivoMixx® box of 30 sachets - vial of 30 microcaps
